Push Rivet - TRPR

Rivet Series Nylon 6 UL HB
 Type Push Rivets TRPR
 Material Nylon 6 UL94V/2 / TMS 001
 Color Black/White
 Unit mm
 Standard Pack 1,000 per bag

Please add B for black, W for white.
 Flame retardant - please add V0 at the end of the part number.

Pawl Lock Rivet - TRPL

Type Pawl Lock
 Material Nylon 6/6 V2 / TMS 001
 Colour Natural/Black
 Hole Size 6.35 mm
 Unit mm
 Standard Pack 1,000 per bag

Part number -
 Nylon 6/6 V2 Natural = TRPL-250-10-01-N
 Nylon 6/6 V2 Black = TRPL-250-10-01-B

Clinch Rivet - TRCR

Type	Clinch Rivet TRCR
Material (Rivet)	Nylon 6 V2 / TMS 052
Material (Mandrel)	Polycarbonate V2 / TMS 072
Colour (Rivet)	Black/White
Colour (Mandrel)	Clear Polycarbonate
Unit	mm

 Installation is achieved using a standard pop-rivet installation gun

Note: Other colours available on request: Grey | Tan | Natural

Drive Fastener - TRDF

Type Drive Fastener TRDF
 Material POM / UL-94-HB TMS014
 Colour Black/Natural
 Unit mm
 Standard Pack 1,000 per bag

Part number example - TRDF-137-010B
 End part number with B for black or N for natural
 No installation tool required

The following material specification is used for identification of manufacturers materials and their properties. All data is obtained from the suppliers of raw materials. It does not represent a binding guarantee. TR Fastenings reserve the right to change manufacturer without notice.

The test material according to UL (Underwriter's Laboratories Inc.) allow classification of polymers according to their flame retardance.

With a horizontal and vertical test of fire behaviour under the influence of an open flame. Detailed information on UL, can be downloaded at, www.ul.com. The ratings are: UL94 -HB/V2/V1/V0

The temperature ranges of the various materials are guidelines received from the respective raw material manufacturers. It does not represent a binding guarantee. TR Fastenings reserve the right to change manufacturer without notice.

RoHS Directives

RoHS (Restriction on Hazardous Substances) refers to the Directive 2002/95/EC of the European Parliament of 27 January 2003 - This directive bans from 1 July 2006, the subsequent use of hazardous substances in electrical and electronic equipment. Lead, mercury, cadmium, hexavalent chromium, polybrominated Biphenyls (PBB), polybrominated biphenyl ethers (PBDEs).

The WEEE (Waste Electronic Equipment) refers to Directive 2002/95/EC of the European Parliament of 27 January 2003. This policy is primarily to avoid the waste of electrical and electronic equipment, as well as their recycling.

Please contact us if you need information regarding the RoHS or WEEE.

All data has been provided by the manufacturers of the raw materials available. It does not represent a binding guarantee TR Fastenings reserve right to change manufacturer without notice. TR Fastenings assumes no responsibility. All information (images, drawings, specifications) in this catalogue are not binding commitments and must be checked independently by the user to ensure product is fit for purpose. Technical changes are always reserved.

Material: Nylon (ROHS)

The material used for the moulded products is Nylon. Its many compositions have most of the properties that are required in the electrical/electronic industry such as:

- **Light Weight**
- **Strength** at low and high temperature
- **Resistance** to impact, abrasion, organic solvents and gasoline
- **Retention of shape** and stiffness at high temperature
- **Flammability rating**
- Colour: **natural and black**. All other RAL-Colours on request
- **ROHS** - Material suppliers to certify compliance with the Restriction of Hazardous Substances in electrical & electronic products.
- **Cost Reduction** where single application plastic part can replace multiple existing parts.

- **Moisture:** Nylon parts are **hygroscopic** (ability to hold water molecules drawn in from its surroundings). Therefore, when injection moulded, nylon parts **retain latent heat** from the manufacturing process and **continue to absorb moisture**.

All of our parts have **water added** before being packed in **sealed plastic bags** to ensure the integrity of the material and to prevent the parts from becoming brittle.

We strongly recommend continued storage of plastic parts in sealed bags.

- **Shelf Life:** All nylon products need be stored in the original, **unopened bag at 22°C to 35°C** and **50% relative humidity**. If these conditions are met the shelf life will be one year from the date of shipment.
- **UL Flame Rating:** UL94 classifications V0, V1, V2 and HB describe the flame retardancy levels for a given resin. V0 rated resins typically have the highest flame resistance followed by V1, V2 and HB.

Acrylic Adhesive Tape (Release Tab)

- **Shelf Life:** The adhesive used has a shelf live of 12 months if stored correctly. Adhesive parts should be stored in the **original bags at room temperature of 22°C to 35°C**.
- **Surface:** The bonding surface must be **clean, uniform, dry** and **free of condensation**.
- Do not use on **fabric or rough, loose surfaces**.
- **Release Tab:** Remove the releaser liner being very careful not to touch the adhesive surface and then quickly and firmly rub the product into place. **Firm pressure** is needed to ensure full contact.
- **Tapes are not UI-rated**
- Material temperature range is: **-20°C to +60°C**.

Quality

- All material is **ISO 14001/2004** compliant.

Spacers & Pillars

Range: F/F Female/Female, M/F Male/Female, M/M Male/Male and Through Hole.

Materials: Steel, stainless steel, brass, aluminium, black nylon, white nylon.

TR Branded Products

Our own range of fastener solutions for specific industries and applications, including:

Fasteners for sheet metal, fasteners for plastic, security fasteners, thread-locking nuts and micro-diameter fasteners from M0.6.

Sheet Metal Fasteners

Cage nuts, blind rivets, blind rivet nuts, Hank® rivet bushes, K-nuts, self clinch, swage nuts, weld nuts & studs.

Other Components

For customers we supply via a Vendor Managed Inventory system such as Direct Line Feed, we can include non-fastener products as part of the supply agreement. We can supply practically any high-volume, low-cost components including:

Cables, clips, plastic parts, connectors, switches, springs, batteries, hinges, levers, handles, brackets, hooks, pins, keys, spacers and stays plus much more.

More features, more products and more data

www.trfastenings.com is designed to be the ultimate go-to resource for engineers, designers and buyers, with improved navigation and functionality throughout.

With an annual output of over 60 billion components, TR supplies to a wide range of industries, from automotive, electronics, telecoms and domestic appliances to marine, audio, petrochemical and general industrial.

The TR website features an online catalogue of over 50,000 products for use in all sectors, from TR's own branded range of fasteners including Hank® self-clinch fasteners and rivet bushes, self-locking nuts, inserts and screws for plastic, blind rivets and rivet nuts, plastic fasteners and cable management products to screws, nuts, washers and specially manufactured parts.

Combining a modern design with a powerful search tool it has never been easier to find the product required. Users can simply search for the product or product range required using any number of search terms and choose from a range of items available and related technical

information. Once the product and size needed has been selected, users can view, send or download a dynamically generated 2D drawing for the part that includes all related dimensional data, download the related 3D model in a number of formats and save the part to the enquiry basket.

In addition, the website carries an extensive Engineering Knowledge Base, which includes:

- A comprehensive range of 2D/3D fastener models available to download
- Step-by-step animated installation guides
- Tooling requirements and related technical information
- Detailed performance data
- Material and finish specifications
- Fastener standards and comparison tables
- Key industries and the services we supply

TR Fastenings is a full service provider and the TR website also features sections on the key industries it supplies and the services and technical support available to its customers, from engineering and design through to specification, manufacturing, quality and logistics.
